

SUCCESS METRICS

Business Metrics

1. **Airport Health Score**
Target: Generate daily operational health score for all airports.
2. **Disruption Risk Score**
Target: Predict disruption probability with greater than 80% model accuracy.
3. **Congestion Forecast Accuracy**
Target: Forecast peak congestion periods with acceptable prediction error.
4. **Root Cause Identification**
Target: Identify top disruption drivers across airports and airlines.
5. **AI Recommendation Coverage**
Target: Generate recommendations for all identified high-risk scenarios.

Analytics Metrics

- 30+ SQL business queries
- 20+ engineered features
- 6 executive dashboards
- 4 machine learning models

Machine Learning Metrics

Classification:

- Accuracy
- Precision
- Recall
- F1 Score

Forecasting:

- MAE
- RMSE
- MAPE

Anomaly Detection:

- Precision
- Detection Rate

Project Metrics

- End-to-end analytics workflow completed
- AI integration successfully implemented
- GitHub repository published
- Portfolio-ready documentation completed
